DESCRIPTION

- 100% Faster- Speed and time savings are achieved due to the following factors.
- Firstly the annular cutter principle of only - cutting material from the periphery of the hole as opposed to the twist drill which must cut the complete diameter of the hole.
- Secondly the benefit of two aggressive sharp angles per cutting edge help to achieve faster feed rates and lower cutting resistance.
- 30% More productivity - Because the annular cutter is only cutting material from the periphery of the hole.
- Less motor energy and driving power is required. The larger the drill diameter the greater the energy saving.
- Longer life time - The annular cutters cutting edges do less work than the twist drill resulting in more holes between sharpening.
- Thick 6 mm body together with special tooth geo-metry ensures high stability and reduces to a minimum the risk of breakage due to overloading.
- Thick walled HSS annular cutters for increased durability and life time.
- With standard 19 mm Weldon reception.
- 30 / 50 mm depth of cut.

FEATURES

Symbol	4932372533
Nazwa	zestaw frezów obwodowych trepanacyjnych HSS
D	14 - 24
Ilość elementów	6
Długość robocza	30.00
